FIRE

Fire Suppression

Safeguarding, people, machinery and the environment

Hushpak, in partnership with Envirotec, delivers industry-leading, environmentally friendly fire suppression systems for mobile/industrial applications from supply to installation, maintenance and servicing. Based locally in Beresfield, Hushpak provides rapid response and strong engineering support.

Envirotec systems are engineered to provide superior fire suppression with minimal environmental and health impacts. The system activates automatically when the detection tube senses heat, releasing the foam agent through the discharge valve and distribution network. Manual activation is also available for added control and safety.

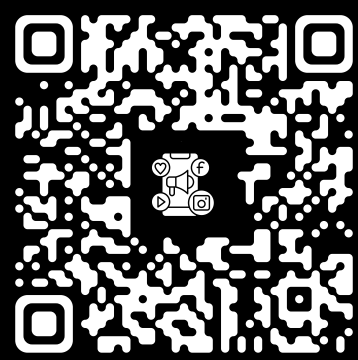

Hushpak offers all three of Envirotec's main suppression systems, Envirotec 360, Envirotec Innov8 and Envirotec Ultra. All systems feature:

- ▶ **A health and environmental focus:** F3 foam technology is fluorine-free, significantly reducing environmental impact while ensuring optimal fire suppression.
- ▶ **Cost efficiency:** By using durable materials and innovative technology, Envirotec systems offer long-lasting performance with minimal maintenance requirements.
- ▶ **Certified to Australian standards:** Meets AS5062-2022 standards for superior safety and performance.
- ▶ **Automatic and Manual activation:** Offers both automatic heat detection and manual activation points for comprehensive control.
- ▶ **Remote monitoring:** Using EnviroWatch the system, pressure can be monitored remotely with advanced notification if pressure in the system is reducing overtime. Envirotec's algorithms allow for temperature change to ensure the pressure data is precise and machines are able to achieve maximum up time. Thresholds can be set for pressure and for pressure drop vs. a set period of time.

Envirotec 360

- **Cost effective solution:** Offers a low-cost alternative without compromising on quality and effectiveness.
- **Versatile applications:** Ideal for mining, public transport, and forestry applications.

Envirotec Innov8

- **Compact design:** Specifically designed for smaller machinery and confined spaces.
- **Versatile applications:** Suitable for a wide range of industries including mining, construction, and transport.

Envirotec Ultra

- **Cost-efficient:** Significant savings with foam usage lasting up to five years.
- **Water discharge for maintenance:** Uses only water for routine maintenance, reducing environmental impact.
- **Patented innovation in ULTRA's external foam cylinder:** Foam is inducted at the time of discharge, ensuring quality and full form foam is generated. The foam cylinder can be isolated for annual discharge purposes. When isolated, the ULTRA cylinder provides a signal to the alarm panel.
